

METROPOLITAN PULMONOLOGY CLINIC - CONSULTATION NOTE

PATIENT NAME: Amanda Rollins | DOB: 03/22/1982 | MRN: 7729103

PHONE: (555) 876-1234 | EMAIL: arollins82@example.com

CONSULTING PHYSICIAN: Dr. Sarah Chen, MD, FCCP

CHIEF COMPLAINT:

Severe headache, recurrent tremors, and elevated resting blood pressure.

MEDICAL HISTORY:

1. Moderate Persistent Bronchial Asthma (two prior ICU admissions for status asthmaticus)
2. Allergic Rhinitis
3. Recurrent Migraine Headaches

CURRENT ACTIVE MEDICATIONS:

- Albuterol HFA Inhaler 90mcg (2 puffs inhaled PRN for acute dyspnea)
- Fluticasone Propionate 110mcg (1 puff inhaled BID)

ALLERGIES:

- Aspirin (precipitates severe acute bronchospasm and facial angioedema)

ASSESSMENT & PLAN:

42-year-old female with reactive airway disease requiring strict avoidance of bronchoconstrictive medications.

Vital signs: BP 148/92 mmHg, eGFR 95 mL/min/1.73m², Creatinine 0.9 mg/dL.

Considering initiating antihypertensive / migraine prophylactic therapy.
